

# MOBILE FOOD VENDING

## PUBLIC ROADS AND LAND FACT SHEET

Mobile food vending involves the transportation and distribution of food for sale from a vehicle.

Mobile food vending on public lands and roads in the Penrith Local Government Area is restricted in some areas in the interest of road safety and so as to not interfere with established food businesses.

Mobile food vendors must remain mobile except when serving customers. A mobile food vendor must not stop any longer than 15 minutes in any one place if they are not serving customers.

The exception to this would be if a mobile vendor is trading at a sporting or temporary event where the vendor has written consent from the sporting or event co-ordinator.

Depending on the event there may also be a need to submit an application to sell food form to Council. This form is available on Council's website.

Trading on any other public lands belonging to Council such as reserves, parks, and foot paths and nature strips is generally not permissible.

Mobile food vending on private land is permissible, in some circumstances, with the permission of the land owner. However you should discuss this with Council in the first instance particularly if you intend to routinely trade in the same location.

Further information on mobile food vending on private land can be found in State Environment Planning Policy (Exempt and Complying Development Codes) 2008.

### COUNCIL APPROVALS

Mobile food vendors require Council approval before food can be sold.

Complete and return the [Mobile Food Vending Vehicle Registration Form](#) to Council's Environmental Health Team. We will contact you if we need to arrange an inspection of your vehicle.

If you are based in another Council area and have an approval from that Council please contact us to discuss your needs.

### FOOD SAFETY SUPERVISOR AND FOOD NOTIFY

Most food businesses in NSW are required by law to appoint at least one trained Food Safety Supervisor. For more information visit the [Food Safety Supervisor section of the NSW Food Authority website](#).

All food handling businesses in NSW must 'notify' their details to NSW Food Authority. It is free to notify online at [www.foodnotify.nsw.gov.au](http://www.foodnotify.nsw.gov.au)

### VEHICLES

Mobile food vending vehicles must be constructed and maintained in accordance with the See the [NSW Food Authority's - Mobile Food Vending Vehicles \(operation, construction and food handling guidelines\)](#).

## RESTRICTED AREAS

Mobile food vending is not approved in areas where it may interfere with road users or established food shops.

In Penrith LGA, it is prohibited in the following areas:

- within a 500 metre radius of commercial areas
- within a 200 metre radius of sporting grounds serviced by a canteen, and
- in any of the following public streets:
